

Tourism partnerships and concessions in protected areas: Cooperating for success

Dr Anna Spenceley
26 February 2018

Federal Ministry for the
Environment, Nature Conservation,
Building and Nuclear Safety

The why of the project

- Secretariat of the Convention on Biological Diversity work on biodiversity and tourism
- Under-use of tourism to finance conservation in protected areas
- Need identified for guidelines, better capacity, networks and sharing of technical information

Project coordinators

TAPAS GROUP
Tourism and Protected Areas Specialist Group

Dr Anna Spenceley, Dr Sue Snyman, Prof Paul Eagles
IUCN World Commission on Protected Areas (WCPA)
Specialist Group

Voluntary technical network (500+)

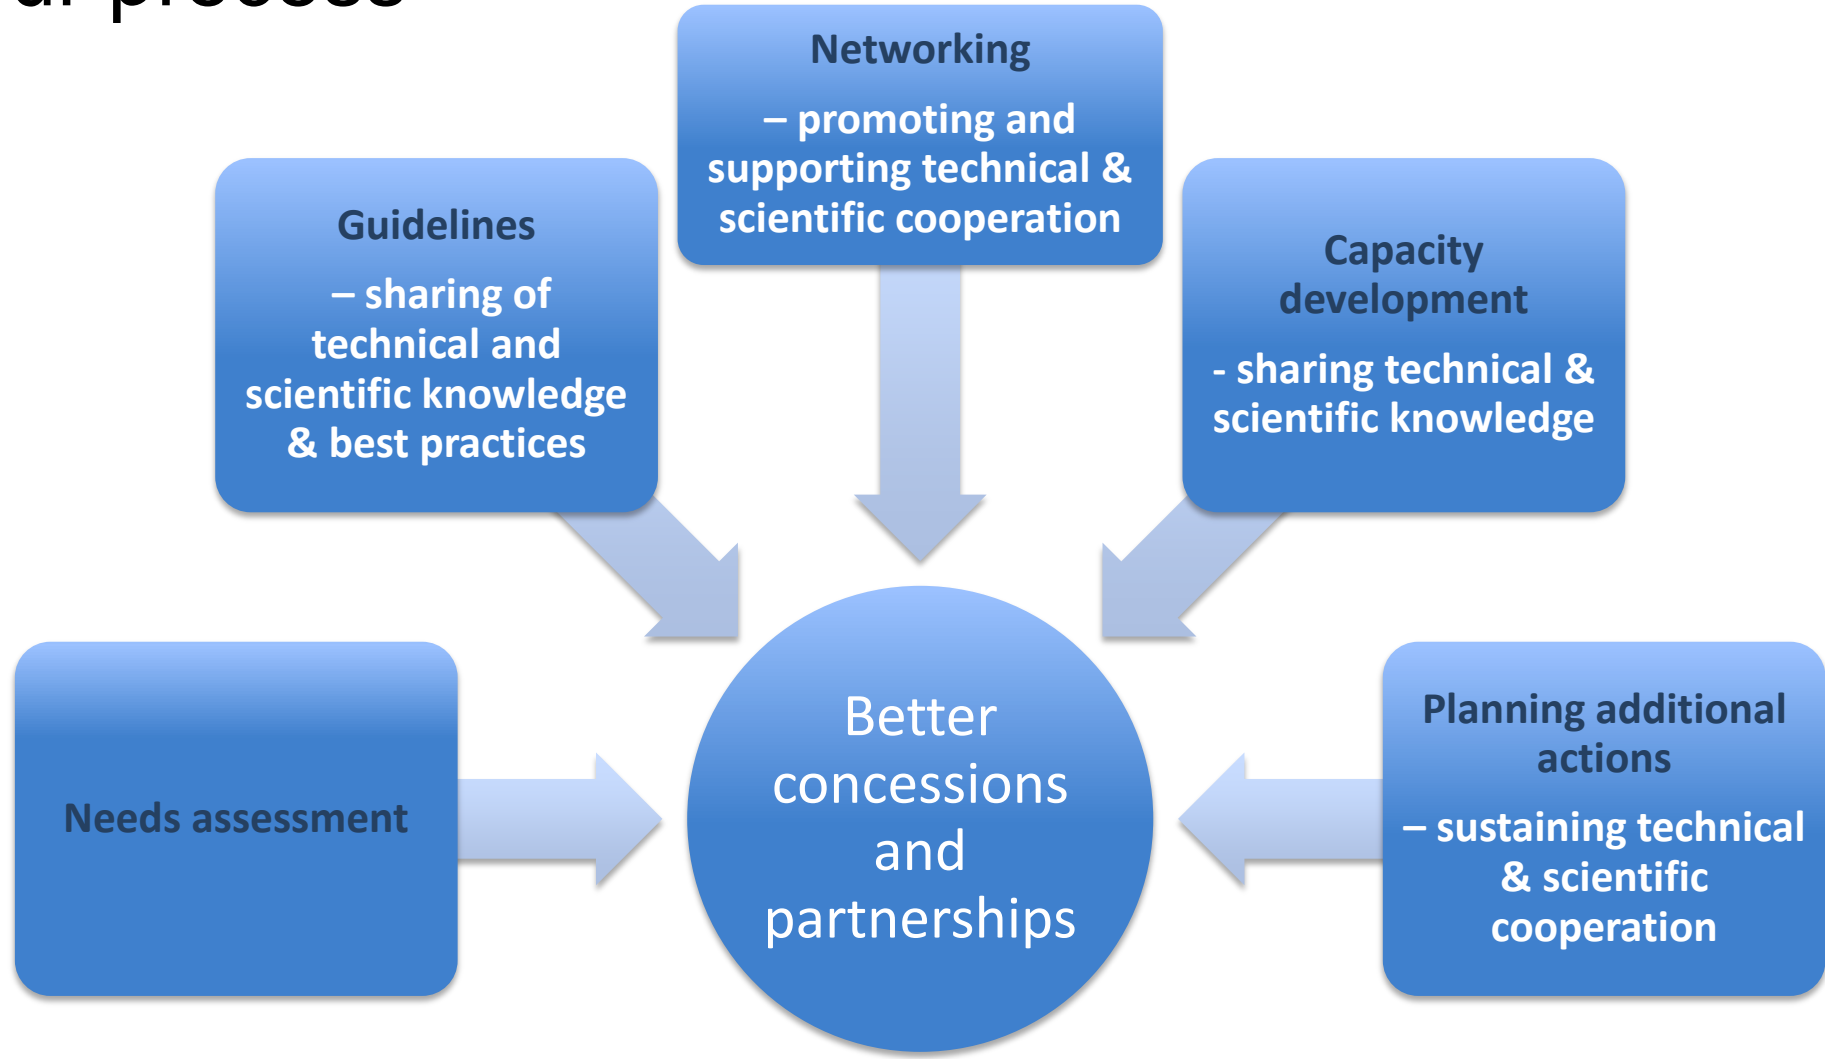

Specialists on tourism and protected areas and areas of
particular importance to biodiversity

Two complementary components:

- 1) **Capacity building initiatives** evaluating and promoting tourism concessions and partnerships in protected areas
 - *German Ministry of Environment (BMUB)*

- 2) Cooperation for **development of tourism concession guidelines** and policies within southern African protected area system
 - *Bio-Bridge Initiative (BBI) financed by the Government of the Republic of Korea*

Our process

Promoting technical and scientific cooperation

- ✓ **Group learning and cooperation** – 3 workshops
- ✓ **Needs assessment** – an effective information basis for presentations and discussions
- ✓ **Personal relationships** - useful for future cooperation, technical support and shared learning
- ✓ **Group speed dating** - allowed for one-on-one discussions and sharing – fun and informal
- ✓ **Field trips** – discussion and engagement with stakeholders
- ✓ **Brainstorming follow-up activities** - ensured future cooperation as involved in creation of ideas & scaling up
- ✓ **Networking sustainability** - TAPAS Group and email groups ensure extensive sharing of technical and scientific knowledge
- ✓ **Improved understanding** of tourism concessions and partnerships among 37 protected area representatives from 13 countries in southern Africa

TAPAS GROUP

Tourism and Protected Areas Specialist Group

iSimangaliso meeting participants

Field trip

Working group session

Enhancing technical and scientific cooperation between the parties:

- **‘Speed-dating’** - creating a relatively informal and enjoyable atmosphere for networking
- **Host-country presentations:** A structured format was provided to participants, drafts reviewed prior to the meeting to ensure learning
- **Flexibility:** Accommodating additional presentations offered by the participants, and sharing their materials.
- **Varying the style of sessions** (e.g. presentations, plenary discussion, field trips, invited speakers) to enhance cooperation
- **Facilitators with varied backgrounds and different skills**
- **Delegate to delegate discussions** on the lessons learned, the strengths and weaknesses of various approaches, and problems to be avoided.
- **On-site visits** involving sharing of technical and scientific knowledge

Namibia meeting participants

Mozambique meeting participants

Working group in Namibia

Field trip to Anvil Bay in Mozambique

Sustaining technical and scientific cooperation:

- Countries already reporting policy and policy instrument adaptation:
 - Malawi – developing a concession monitoring framework, using discussions and tools shared. Proposal to review concession submissions anticipated based on learnings from the workshops.
 - Zimbabwe - pursuing an auction for “photographic” tourism concession sites and working on an auction brochure to try and include a screening process.
 - Mozambique – use of materials to work on the harmonization of concessions in protected areas.
 - Madagascar – adaptation of the legal framework for tourism concessions.
- Creation of a collaborative network due to the comradely ‘spirit’ of the workshop – ‘buddy’ system
- Numerous countries mentioned follow-up initiatives, including collaborating with other countries & further sharing technical and scientific knowledge and experience

Draft components for Phase 2 to foster sustained TSC

- Component 1: Capacity building on tourism concessions and partnerships in protected areas in other regions, such as Latin and Central America
- Component 2: Scaled-up country-specific capacity building and networking in southern Africa
- Component 3: Online training modules to support tourism concessioning internationally
- Component 4: Research on protected area financing from tourism
- Component 5: Exchange visit of African and Latin American delegates to Canada
- Component 6: Online tourism concession investment promotion platform

Thank you to all who were involved in, and supported, the project:

All country participants and Mozambican, Namibian, and South African authorities for logistical, technical and scientific support

THANK YOU FOR YOUR TIME
